MED AIRE FLEXWAVE MATTRESS SYSTEM

Item number: 820000300

The Mattress replacement system combines flexible user settings with maximum comfort. Approved for a user weight of 20 kg to 200 kg, the MED AIRE FlexWave alternating pressure system also offers variable cycle time settings and can be customised thanks to the nursing, sitting and static functions. The automatic cell pressure adjustment reacts to changes in the patient's position. The cell-on-cell design eliminates the need for a foam underlay.

- Sitting & care function and static soft positioning
- Variably adjustable change cycle from 10 to 25 minutes
- Automatic cell pressure adjustment when the patient changes position
- Manual weight adjustment possible
- With intelligent automatic start/stop function
- Automatic button lock after 30 seconds
- Bi-elastic, quilted and breathable cover
- Quick repair of the mattress as air cells can be replaced individually
- Can be used for mild to very high pressure ulcer risk, as well as to support pressure ulcer therapy (cat. 1-4*)

***For people who can change their lying position themselves or with help on a regular basis!**
